, Continuation Sheet (PTO-303) . 009/192,014

Application No.

Continuation of 2. NOTE:

Applicant's added limitation of "on the image representative of the document" specifically directs a specified service to be performed on said image, resulting in a change in scope, therefore requiring further search and/or consideration (as presently claimed, this image is an electronic image resulting from the scanned hardcopy document.

It is to be noted that the added limitation reflects a change in scope from independent claims 11 and 14-15, since said claims can be possibly interpreted as a service performed on a hardcopy document (not its electronic image), therefore, said added limitation was not previously addressed in any of the pending claims.

Continuation of 5. does NOT place the application in condition for allowance because:

Applicant's arguments are substantially based upon new issues as presented above.

In addition, Irons teaches a label containing information regarding disposition of a document, as well as storing a code as an index. Barton teaches a routing code specifying the course of direction of a physical piece of mail. Routing codes are known and common within the U.S. Postal System, the routing of mail reflects one of many services the U.S. Post Office provides.

Applicant's current claim 11 reflects the combined subject matter of claims 11 and 8 (now canceled), as well as the added limitation directing a service code "specifying a service to be performed on said hardcopy document". Applicant's original claim 11 only claims a data code further comprising a service code. It is additionally noted that claims 14-15 are similar in scope to current claim 11.
